TALLHEDA

(T)ransforming access to excellence with successful (ALL)iances of (H)igher (E)ducation in (D)igital (A)griculture

TALLHEDA aims to address the lag behind in Research & Innovation investment, particularly in Digital Agriculture by establishing a long-term alliance between agricultural Higher Education Institutions (HEIs) in Widening countries and leading non-widening agricultural universities.

This alliance, drawing on the expertise of partners like Higher Education Institutions, seeks to elevate research and education standards, fostering innovation and increasing the pool of skilled scientists.

Through collaborative efforts, TALLHEDA aims to enhance the Quadruple Helix of innovation in Widening countries, ultimately advancing the digital transition in European agriculture.

Funded by the European Union

Funding scheme: HORIZON-WIDERA-2023-ACCESS-03-01
Type of action: HORIZON-CSA
EU Contribution: 3.097.341,00 euros
Duration: January 2024 – June 2027
Consortium: 10 partners across 3 countries
Coordinator: Agricultural University of Athens
